

Looking Ahead: Government's Technology Priorities

Throughout the year, we routinely survey our federal, state and local community of over 270,000 public servants on their latest priorities, needs and opportunities. The results of our polls and surveys show that government is primed to take advantage of emerging technologies and focused on IT modernization.

Demographics & Interests

Our community is a robust mix of public servants from different levels of government, with varying levels of experience. They're also interested in a wide range of topics, which they engage with across multiple types of resources.

Modernization Priorities

Many agencies are interested in modernizing current systems and pursuing emerging technologies. A main driver is the fact that many current technology investments aren't meeting government needs and new tools could improve service delivery or cut costs.

Challenges & Opportunities

While many public servants are interested in technology, there is still a gap in knowledge on many new tools and strategies, technology priorities, and how they impact agencies' mission. Public servants could use more training on these technologies.
