

MULTI-INT ANALYTICS

AGEON ISR

Real-time mission control and forensic analysis.

Combining live data from sensors, systems, and open sources, Ageon ISR is a real-time web application that provides actionable intelligence to commanders on the ground. Ageon ISR's cutting-edge command, control, and communication capabilities are shared between platforms or tactical nodes across a network, providing operators and analysts with visualization, exploitation, and forensic tools.

KEY FEATURES

- Thin-Client – 100% Browser-Based
- Full, Remote Sensor Control
- Object Detection and Sensor Correlation
Enable Autonomous Command and Control
- Full Localization – RTL Languages Supported
- Common Data Formats – Defense Sector and Commercial
- Real-Time Federation Across Installations
- Remote Management/System Administration
- Runs on COTS Hardware/Devices
- ITAR Compliant/Exportable

BENEFITS

- 10+ Years of Proven Deployment
- Superior Mission Flexibility
- Rapid Sensor and System Integration
- Echelon Command Interoperability
- Data Efficiency to Accommodate 'Big Data, Small Pipe' World

APPLICATIONS

- Force Protection
- Border Security
- Maritime Domain Awareness
- Critical Infrastructure Security
